

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	03 July 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Customer Order Analysis	Analyse customer ordering patterns based on cuisine, meal type, and order frequency.
FR-2	Restaurant Performance Analysis	Display top-performing restaurants based on ratings, total orders, and customer reviews.
FR-3	Consumer Trends Dashboard	Visualize peak order times, popular cuisines, and spending trends using interactive dashboards.

Non-functional Requirements:

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The dashboard should be user-friendly, easy to navigate, and provide interactive visualizations.
NFR-2	Security	The project should ensure that the dataset is protected and only authorized users can access or modify it.
NFR-3	Reliability	The dashboard should generate accurate results consistently without errors or crashes.
NFR-4	Performance	The dashboard should load charts, filters, and reports quickly with minimal response time.
NFR-5	Availability	The dashboard should be available whenever users need to access and analyze the data.
NFR-6	Scalability	The dashboard should be capable of handling larger datasets and additional visualizations without significant performance degradation.
