

Ideation Phase
Define the Problem Statements

Date	02 July 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	2 Marks

Customer Problem Statement:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A food delivery customer	Find restaurants that match my preferences and budget	There are too many options with limited personalized insights	It takes time to compare ratings, prices, and cuisines	Confused and frustrated
PS-2	A restaurant owner	Understand customer ordering behaviour and popular food trends	Customer data is scattered & difficult to analyse.	I cannot easily identify peak order times, top-selling items, or customer preferences	Uncertain about making business decisions
PS-3	A food delivery platform manager	Improve customer satisfaction and increase order volume	I lack a clear view of customer trends and ordering patterns	Without data-driven insights, it is difficult to optimize recommendations and marketing strategies	Concerned about losing customers and business growth
