

Project Design Phase
Problem – Solution Fit Template

Date	05 July 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	2 Marks

The Problem-Solution Fit:

The proposed solution addresses the challenges faced by food delivery businesses and restaurant owners in understanding customer ordering behavior and market trends. By analyzing food ordering data using Tableau, the project converts raw data into meaningful insights that support informed business decisions. The interactive dashboards help identify customer preferences, popular cuisines, peak ordering hours, restaurant performance, and spending patterns. This enables stakeholders to improve customer satisfaction, optimize business strategies, and enhance overall operational efficiency.

Purpose

- **Understand Customer Behavior:** Analyze customer ordering patterns, preferences, and spending habits to better understand consumer needs.
- **Support Data-Driven Decisions:** Provide interactive dashboards and visual reports that help businesses make faster and more accurate decisions.
- **Improve Business Performance:** Identify popular cuisines, peak order times, and high-performing restaurants to optimize operations and marketing strategies.
- **Enhance Customer Experience:** Use insights from customer trends to offer better recommendations, improve service quality, and increase customer satisfaction.
- **Transform Raw Data into Actionable Insights:** Convert large volumes of food ordering data into meaningful visualizations that are easy to interpret and use for business growth.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? I.e. working parents of 0-5 y.o. kids	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace)	
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure > confident, in control - use it in your communication strategy & design.		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.
